

## **Changes in Code Done (Pushed in branch 'console\_rhl8\_Aditya\_TPlus0') –**

We had three flags to filter contracts during upload:

1. **BSECashUpload\_TPluseZero**
  - **true:** Upload contracts with T+0 settlement.
  - **false:** Skip uploading T+0 contracts.
2. **BSECashUpload\_InstTypeEquity**
  - **false:** Upload all contracts where FinInstrmTp = 'E' / 'D' / 'C'.
  - **true:** Upload only equity contracts (FinInstrmTp = 'E') that have a valid ISIN (ISIN starting with 'IN') and fall within the standard token series (i.e., FinInstrmId between **500000** and **599999**).
3. **BSECashUpload\_Suspended**
  - **true:** Upload contracts regardless of their suspension status (Sts = 'A' for Active or Sts = 'S' for Suspended).
  - **false:** Upload only active contracts (Sts = 'A'), i.e., exclude suspended ones (Sts != 'S').

Now with this **3 flags** we can have total **8 combinations** to upload the **BSE Contracts** which reflects in 'GreekBSEToken' and 'Contracts' Table under **market\_id = 4**. This are shown in below Image -  
(Note: Taking the reference of **New Contracts Contract** on **08-05-2025** and File name - **'BSE EQ SCRIP 08052025.csv'**)

m_bBSECashUpload_DeleteTPluseZero	TRUE	TRUE	TRUE	TRUE
m_bBSECashUpload_InstTypeEquity	TRUE	TRUE	FALSE	FALSE
m_bBSECashUpload_Suspended	TRUE	FALSE	TRUE	FALSE
<b>Total Upload Count</b>	<b>6723</b>	<b>5314</b>	<b>16952</b>	<b>13098</b>
m_bBSECashUpload_DeleteTPluseZero	FALSE	FALSE	FALSE	FALSE
m_bBSECashUpload_InstTypeEquity	TRUE	TRUE	FALSE	FALSE
m_bBSECashUpload_Suspended	TRUE	FALSE	TRUE	FALSE
<b>Total Upload Count</b>	<b>6298</b>	<b>4892</b>	<b>16527</b>	<b>12676</b>

Now overall contracts upload for BSE EQ follows below –

### **Case 1:**

**BSECashUpload\_InstTypeEquity** = false &  
**BSECashUpload\_Suspended** = true

And we check for **BSECashUpload\_TPluseZero** = true  
 We are getting **Total Upload Count** = 16952

Here we upload all the contracts, with **FinInstrmTp = 'E' / 'D' / 'C'** be it **suspended or not** having **valid ISIN or not**, it is **in normal token series or not** and also the **T+0** contracts as its flag is true. So be it anything we upload all the contracts.

**Case 2:**

**BSECashUpload\_InstTypeEquity** = false &  
**BSECashUpload\_Suspended** = true

And we check for **BSECashUpload\_TPluseZero** = false  
 We are getting **Total Upload Count** = 16527

Here we upload all the contracts, with **FinInstrmTp** = 'E'/ 'D'/ 'C' be it **suspended or not** having **valid ISIN or not**, it is **in normal token series or not**, we upload all the contracts just removing the **T+0** as its flag is false.

**Case 3:**

**BSECashUpload\_InstTypeEquity** = false &  
**BSECashUpload\_Suspended** = false

And we check for **BSECashUpload\_TPluseZero** = true  
 We are getting **Total Upload Count** = 13098

Here we upload all the contracts, with **FinInstrmTp** = 'E'/ 'D'/ 'C' having **valid ISIN or not**, it is **in normal token series or not**, we upload all the contracts and also the **T+0** contracts as its flag is true; just removing the suspended ones with Suspended status **i.e. Sts = 'S'** as its flag is false. Now after changes the Tables in the database will not include 2 contracts which have Suspended status **i.e. Sts = 'S'** and which gets uploaded before and we were not able to Bypass them as they were IPO or Relist (**CallAuctnInd = 1 and 2** respectively). The Contracts had Token, Symbol and Script name as below –

Sr. No.	FinInstrmId (Token)	TckrSymb (Symbol)	FinInstrmNm (Script Name)
1	506580 - Relist	PBGLOBAL	PB Global Limited
2	544255 - IPO	TRAFIKSOL	TRAFIKSOL ITS TECHNOLOGIES LIM

**Case 4:**

**BSECashUpload\_InstTypeEquity** = false &  
**BSECashUpload\_Suspended** = false

And we check for **BSECashUpload\_TPluseZero** = false  
 We are getting **Total Upload Count** = 12676

Here we upload all the contracts, with **FinInstrmTp** = 'E'/ 'D'/ 'C' having **valid ISIN or not**, it is **in normal token series or not**, we upload all the contracts just removing the **T+0** contracts and the suspended ones with Suspended status **i.e. Sts = 'S'** as their flags is false. Now after changes the Tables in the database will not include 2 contracts which have Suspended status **i.e. Sts = 'S'** and which gets uploaded before and we were not able to Bypass them as they were IPO or Relist (**CallAuctnInd = 1 and 2** respectively). The Contracts had Token, Symbol and Script name as below –

Sr. No.	FinInstrmId (Token)	TckrSymb (Symbol)	FinInstrmNm (Script Name)
1	506580 - Relist	PBGLOBAL	PB Global Limited
2	544255 - IPO	TRAFIKSOL	TRAFIKSOL ITS TECHNOLOGIES LIM

**Case 5:**

**BSECashUpload\_InstTypeEquity** = true &  
**BSECashUpload\_Suspended** = true

And we check for **BSECashUpload\_TPluseZero** = true  
 We are getting **Total Upload Count** = 6723

Here we upload the contracts, with **FinInstrmTp = 'E'** only having valid ISIN i.e. **ISIN starting with 'IN'**, it is in Normal Token Series i.e. **FinInstrmId between 500000 – 599999**, we upload all the contracts with above conditions including the T+0 contracts which are suspended ones also with Suspended status i.e. **Sts = 'S'** as both have their flags as true. Now after changes the Tables in the database will not include 1 contracts which is not in Normal Token Series i.e. **FinInstrmId between 500000 – 599999** and which gets uploaded and we were not able to Bypass it as it is Relist (**CallAuctnInd = 2**). The Contracts had Token, Symbol and Script name as below –

Sr. No.	FinInstrmId (Token)	TckrSymb (Symbol)	FinInstrmNm (Script Name)
1	211501 - Relist	DRSCARGO	DRS CARGO MOVERS LIMITED

**Case 6:**

**BSECashUpload\_InstTypeEquity** = true &  
**BSECashUpload\_Suspended** = true

And we check for **BSECashUpload\_TPluseZero** = false  
 We are getting **Total Upload Count** = 6298

Here we upload the contracts, with **FinInstrmTp = 'E'** only having valid ISIN i.e. **ISIN starting with 'IN'**, it is in Normal Token Series i.e. **FinInstrmId between 500000 – 599999**, we upload all the contracts with above conditions which are even suspended ones with Suspended status i.e. **Sts = 'S'** but excluding the T+0 contracts as its flag is false. Now after changes the Tables in the database will not include 1 contracts which is not in Normal Token Series i.e. **FinInstrmId between 500000 – 599999** and which gets uploaded and we were not able to Bypass it as it is Relist (**CallAuctnInd = 2**). The Contracts had Token, Symbol and Script name as below –

Sr. No.	FinInstrmId (Token)	TckrSymb (Symbol)	FinInstrmNm (Script Name)
1	211501 - Relist	DRSCARGO	DRS CARGO MOVERS LIMITED

**Case 7:**

**BSECashUpload\_InstTypeEquity** = true &  
**BSECashUpload\_Suspended** = false

And we check for **BSECashUpload\_TPluseZero** = true  
 We are getting **Total Upload Count** = 5314

Here we upload the contracts, with **FinInstrmTp = 'E'** only having valid ISIN i.e. **ISIN starting with 'IN'**, it is in Normal Token Series i.e. **FinInstrmId between 500000 – 599999**, we upload all the contracts including the T+0 contracts with above conditions excluding the suspended ones with Suspended status i.e. **Sts = 'S'** because its flag is false. Now after changes the Tables in the database will not include total 3 contracts which should not be uploaded i.e., 2 contracts which have Suspended status

i.e. **Sts = 'S'** and 1 contract which is not in Normal Token Series i.e. **FinInstrmId between of 500000 – 599999** which gets uploaded and we were not able to Bypass them as they are IPO or Relist (**CallAuctnInd = 1 and 2** respectively). The Contracts have Token, Symbol and Script name as below –

Sr. No.	FinInstrmId (Token)	TckrSymb (Symbol)	FinInstrmNm (Script Name)
1	506580 - Relist	PBGLOBAL	PB Global Limited
2	544255 - IPO	TRAFIKSOL	TRAFIKSOL ITS TECHNOLOGIES LIM
3	211501 - Relist	DRSCARGO	DRS CARGO MOVERS LIMITED

#### Case 8:

**BSECashUpload\_InstTypeEquity** = true &  
**BSECashUpload\_Suspended** = false

And we check for **BSECashUpload\_TPluseZero** = true  
We are getting **Total Upload Count** = 4892

Here we upload the contracts, with **FinInstrmTp = 'E'** only having valid ISIN i.e. **ISIN starting with 'IN'**, it is in Normal Token Series i.e. **FinInstrmId between 500000 – 599999**, we upload all the contracts with above conditions excluding the suspended ones with Suspended status i.e. **Sts = 'S'** and the **T+0** contracts as both have its flags as false. Now after changes the Tables in the database will not include total 3 contracts which should not be uploaded i.e., 2 contracts which have Suspended status i.e. **Sts = 'S'** and 1 contract which is not in Normal Token Series i.e. **FinInstrmId between of 500000 – 599999** which gets uploaded and we were not able to Bypass them as they are IPO or Relist (**CallAuctnInd = 1 and 2** respectively). The Contracts have Token, Symbol and Script name as below –

Sr. No.	FinInstrmId (Token)	TckrSymb (Symbol)	FinInstrmNm (Script Name)
1	506580 - Relist	PBGLOBAL	PB Global Limited
2	544255 - IPO	TRAFIKSOL	TRAFIKSOL ITS TECHNOLOGIES LIM
3	211501 - Relist	DRSCARGO	DRS CARGO MOVERS LIMITED

#### Hence this changes I made in code –

```
bool bSkipUpload = ((!isInsType_EQ || !isValidISIN || !isNormalTokenSeries) &&
m_bBSECashUpload_InstTypeEquity) || (isSuspended && !m_bBSECashUpload_Suspended);
if (strlen(ObjGreekBSEToken.cSymbol) &&
ObjGreekBSEToken.cSymbol[strlen(ObjGreekBSEToken.cSymbol) - 1] == '#')
{
    if (!m_bBSECashUpload_TPlusZero)
        bSkipUpload = true;

    else if (!isSuspended || m_bBSECashUpload_Suspended)
        bSkipUpload = false;
}
if (bSkipUpload)
```

### **Condition 1 –**

```
bool bSkipUpload = ((!isInsType_EQ || !isValidISIN || !isNormalTokenSeries) &&  
m_BBSECashUpload_InstTypeEquity) || (isSuspended && !m_BBSECashUpload_Suspended);
```

If **m\_BBSECashUpload\_InstTypeEquity** = false

means (!isInsType\_EQ || !isValidISIN || !isNormalTokenSeries) = true / false doesn't matter as we are comparing with && operator.

And then comparing with Suspension status

For Suspended Status = 'S' -> isSuspended = true

Suspended Status = 'A' -> isSuspended = false (Because its an active Contract).

- Now comes the flag **m\_BBSECashUpload\_Suspended** which decides whether to allow uploading the suspended contracts or not so first we classify the contract as Active/ Suspended based on **isSuspended** and then do && with **m\_BBSECashUpload\_Suspended** to check whether to allow them for uploading or not.
- From this we get **bSkipUpload** initialized. And this is the main condition to be checked for all the contracts.

### **Condition 2 –**

Then for **T+0** contracts we check specially again as they are **contracts which ends with '#'**.

- Now if the flag representing T+0 is **m\_BBSECashUpload\_TPlusZero** = true we do not skip them and upload them
- If it's false we skip them.
- Also we check for their Suspension status **m\_BBSECashUpload\_Suspended**
  - If they are suspended but flag is true we upload them and
  - If the flag is false we only upload the active **T+0** contracts

I have excluded this security upload during **m\_BBSECashUpload\_InstTypeEquity = true**

**Because they are not tradable and banned so when we filter out contracts of Equity Type we just need the tradable contracts and not the banned contracts.**

The contracts status is as below –

Sr. No.	FinInstrmId (Token)	TckrSymb (Symbol)	FinInstrmNm (Script Name)
1	506580 - Relist	PBGLOBAL	PB Global Limited
